

> *Welcome to my second assignment :)*

- I enjoyed working on it very much
- I would do more like this in the future
- during the summer break I will do my own project
 - A model recoginizing my writing and transform it to a text on a computer which I can copy or paste anywhere. This would be only personal use
 - This was one of my long lasting questions I had in mind after one of my family members asked me why does not this exist.
 - It does but I will find where it goes wrong
